GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA
There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

Dear Ms. Jarne:

STATEMENT NO. 10397 SOUTH FORK DRY CREEK IN PLACER COUNTY; AND
STATEMENT NO. 10398 NORTH FORK DRY CREEK IN PLACER COUNTY

This letter is to follow up our phone conversations on
April 6, 1995 concerning the reporting requirements for the
different water rights held by Placer County Water Agency.

As we discussed, persons diverting water under claim of riparian
rights or pre-1914 appropriative rights, with certain exceptions,
are required to file a "Statement of Water Diversion and Use"
(Statement) with our office. The Statements are completed for
diversions during a calendar year and should be filed before July
1 of the succeeding year. We assign each new Statement a unique
number. Thereafter, we distribute pre-printed Supplemental
Statement forms at three-year intervals for the owners to
summarize their actual water use. For additional information,
please refer to the enclosed pamphlet titled "Statements of Water
Divisions and Use," July 1977.

Our records show that Placer County Water Agency has filed four
Statements. As requested, enclosed are copies of material
associated with Statements 10397 and 10398, the two claims of
pre-1914 appropriative rights that Placer County Water Agency
purchased from PG&E in 1984. Based on my review of our files, it
appears we have not received any Supplemental Statement forms on
these two claims summarizing water use since February 1984.
Enclosed for your use are blank Supplemental Statement forms if
you have any information on water use during that period.

If you have any questions, please write or telephone me at the
above number.

Sincerely,
